

Aloha Cargo Transport

Division of Northland Services, Inc.

December 08, 2009

To All of our Valued Customers:

GENERAL RATE INCREASE FOR 2010

Aloha Cargo Transport has filed for an increase in rates in our Hawaii service. The change will become effective on January 4, 2010 and will first apply to cargo departing on Voyage H001. A rate-based increase of 3.5 % will apply to containers, platforms / flatracks, break-bulk commodities and certain ancillary charges in both Tariffs STB AHCT-251A and STB AHCT-252A. This increase will not apply to selected rates and charges within the Rules sections of either tariff.

The current terminal handling charges will be increased by a nominal percentage for each full container or platform from the current westbound and eastbound rates between Seattle and Hawaii ports as follows:

20' - 24' Containers and Platforms, Westbound:	\$ 480.00
40' - 53' Containers and Platforms, Westbound:	\$ 585.00
20' - 24' Containers and Platforms, Eastbound:	\$ 200.00
40' - 53' Containers and Platforms, Eastbound:	\$ 250.00

For break-bulk commodities, there will be an increase in the Terminal Handling Charge for items that are rated on any basis other than full container or platform loads of one-half of one percent (from 10.0% to 10.5%) of the ocean freight charge.

We will make distribution of tariff pages for subscribers as soon as they are available. Please contact your sales or customer service representative if we can answer questions that may relate to the timing of any particular shipment.

Sincerely,

A handwritten signature in black ink, appearing to read 'R. Maxwell'.

Richard Maxwell,
Vice President and General Manager
